

80'S RETRO

80s style has been influencing contemporary design for the last handful of years, reframing the conversation around what is now considered 'retro.' It's resurgence is rooted in Memphis design (grids and simple solid shapes and geometric patterns), soft pastels reminiscent of the Golden Girls with bungalow palms (see monstera and other tropical houseplants trend), terrazzo and mixed media surfaces, neon and chrome, and a neo-futuristic vibe (spaceships and cosmic energy). For a period filled with what is some tacky design, the beloved aesthetics of today are inspired by them.
